COORDINATION CHEMISTRY REVIEWS, VOLS. 216–217 (2001)

SUBJECT INDEX

Actinide
  Actinide expanded porphyrin complexes 411
Adamantane
  Dinuclear metal complexes and ligands: stabilities and catalytic effects 55
Amido
  New transition metal imido chemistry with diamido-donor ligands 65
Amino acid analogues
  Complexes of tetraazacycles bearing methylphosphinic/phosphonic acid pendant arms with copper(II), zinc(II) and lanthanides(III). A comparison with their acetic acid analogues 287
Anion recognition agents
  The development of chiral metallacrowns into anion recognition agents and porous materials 489
Assembling/disassembling process
  Controlling the assembling/disassembling process of metal-containing superstructures 435
Autocatalysis
  The reactions of transition metal ions with chlorine(III) 449
Azacrown macrocycles
  Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127

Bioinorganic chemistry
  ICCC34 — golden edition of coordination chemistry reviews. Coordination chemistry for the neurosciences 333
Biological element selection
  Chemical selection of elements by cells 583

Catenanes
  Coordination polymers: polymers, rings and oligomers containing gold(I) centres 313
Cell permeability
  Studies on the genotoxicity of chromium: from the test tube to the cell 537
Cellular genotoxicity
  Studies on the genotoxicity of chromium: from the test tube to the cell 537
Charge distribution
  Studies on charge distribution and valence tautomerism in transition metal complexes of catecholate and semiquinonate ligands 99
C–H bond activation
  New transition metal imido chemistry with diamido-donor ligands 65
Chemosensing
  Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173
Chiral metallacrowns
  The development of chiral metallacrowns into anion recognition agents and porous materials 489
Chlorite ion
  The reactions of transition metal ions with chlorine(III) 449
Chlorito complexes
  The reactions of transition metal ions with chlorine(III) 449
Chromium
  Studies on the genotoxicity of chromium: from the test tube to the cell 537
Co(III) complexes
  Shape- and enantioselective interaction of Ru(II)/Co(III) polypyridyl complexes with DNA 513
Conformational change
  Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127

PII: S0010-8545(01)00374-5

Coordination chemistry
Actinide expanded porphyrin complexes 411
Coordination polymers
Coordination polymers: polymers, rings and oligomers containing gold(I) centres 313
Copper
Doubly pyridazine-bridged macrocyclic complexes of copper in +1, +2 and mixed valent oxidation states 3
Copper(I) complexes
Schiff-based bipyridine ligands. Unusual coordination features and mesomorphic behaviour 195
Crown ether
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173
Cu(II)/Cu(I) redox couple
Controlling the assembling/disassembling process of metal-containing superstructures 435
Cyclen and cyclam derivatives
Complexes of tetraazacycles bearing methylphosphinic/phosphonic acid pendant arms with copper(II), zinc(II) and lanthanides(III). A comparison with their acetic acid analogues 287
Cycloaddition
New transition metal imido chemistry with diamido-donor ligands 65

Dinucleating macrocyclic ligand
Dinuclear metal complexes and ligands: stabilities and catalytic effects 55
DNA
Shape- and enantioselective interaction of Ru(II)/Co(III) polypyridyl complexes with DNA 513
DNA-damage
Studies on the genotoxicity of chromium: from the test tube to the cell 537

Electrochemistry
Controlling the assembling/disassembling process of metal-containing superstructures 435
Doubly pyridazine-bridged macrocyclic complexes of copper in +1, +2 and mixed valent oxidation states 3
Electronic spectroscopy
Photochemistry and electronic spectroscopy of the $Ru(SnPh_3)_2(CO)_3$(α-diimine) complexes: an ab initio investigation of the model system $Ru(SnH_3)_2(CO)_3$(Me-DAB) (DAB = 1,4-diaza-1,3-butadiene) 31
Electron transfer
The reactions of transition metal ions with chlorine(III) 449
Emission
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173
Enantioselectivity
Shape- and enantioselective interaction of Ru(II)/Co(III) polypyridyl complexes with DNA 513
EPR
Similarities and differences between the isoelectronic Gd^{III} and Eu^{II} complexes with regard to MRI contrast agent applications 363
Eu^{II}
Similarities and differences between the isoelectronic Gd^{III} and Eu^{II} complexes with regard to MRI contrast agent applications 363
Evolution
Chemical selection of elements by cells 583
Expanded porphyrin
Actinide expanded porphyrin complexes 411

Fe(II) complex
Dinuclear metal complexes and ligands: stabilities and catalytic effects 55
Fe(III) complex
Dinuclear metal complexes and ligands: stabilities and catalytic effects 55

Gd^{III}
Similarities and differences between the isoelectronic Gd^{III} and Eu^{II} complexes with regard to MRI contrast agent applications 363
Genetic control
Chemical selection of elements by cells 583
Gold–gold interaction
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173
Gold(I)
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173

Hammett parameter
Tuning metalloporphyrin and metallophthalocyanine redox potentials using lig-

and electrochemical (E_L) and Hammett (σ_p) parametrization 45
Heavy-metal
Transition and post-transition metal systems incorporating linked synthetic macrocycles as structural elements 249
Hydrogen-bonding
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127
Hydrogen bonds
Design of organometallic molecular and ionic materials 225
Hydroxy radical
Studies on the genotoxicity of chromium: from the test tube to the cell 537

Imido
New transition metal imido chemistry with diamido-donor ligands 65
Iminoether ligands
Current status of *trans*-platinum compounds in cancer therapy 383
Intracellular spectroscopy
Studies on the genotoxicity of chromium: from the test tube to the cell 537
Ion probe
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173

Kinetic insertion
Chemical selection of elements by cells 583

LA-ICP mass spectroscopy
New chemistry with old ligands: *N*-alkyl- and *N*,*N*-dialkyl-*N*′-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473
Ligand electrochemical parameter
Tuning metalloporphyrin and metallophthalocyanine redox potentials using ligand electrochemical (E_L) and Hammett (σ_p) parametrization 45
Light switch
Shape- and enantioselective interaction of Ru(II)/Co(III) polypyridyl complexes with DNA 513
Linear gold(I) centres
Coordination polymers: polymers, rings and oligomers containing gold(I) centres 313
Linked-macrocycles
Transition and post-transition metal systems incorporating linked synthetic macrocycles as structural elements 249
Liquid crystalline properties
Schiff-based bipyridine ligands. Unusual coordination features and mesomorphic behaviour 195
Luminescence
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127
Luminescence signalling
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173

Macrocycle
Actinide expanded porphyrin complexes 411
Doubly pyridazine-bridged macrocyclic complexes of copper in +1, +2 and mixed valent oxidation states 3
Transition and post-transition metal systems incorporating linked synthetic macrocycles as structural elements 249
Mechanisms of reduction
Studies on the genotoxicity of chromium: from the test tube to the cell 537
Metal-containing superstructures
Controlling the assembling/disassembling process of metal-containing superstructures 435
Metal equilibria
Chemical selection of elements by cells 583
Metal helicates
Controlling the assembling/disassembling process of metal-containing superstructures 435
Metal ions
ICCC34 — golden edition of coordination chemistry reviews. Coordination chemistry for the neurosciences 333
Metallome.
Chemical selection of elements by cells 583
Metallophthalocyanines
Tuning metalloporphyrin and metallophthalocyanine redox potentials using ligand electrochemical (E_L) and Hammett (σ_p) parametrization 45
Metalloporphyrins
Tuning metalloporphyrin and metallophthalocyanine redox potentials using ligand electrochemical (E_L) and Hammett (σ_p) parametrization 45

Mixed ammine/amine ligands
Current status of *trans*-platinum compounds in cancer therapy 383
Mixed-valent
Doubly pyridazine-bridged macrocyclic complexes of copper in +1, +2 and mixed valent oxidation states 3
Model system
Photochemistry and electronic spectroscopy of the $Ru(SnPh_3)_2(CO)_2$(α-diimine) complexes: an ab initio investigation of the model system $Ru(SnH_3)_2(CO)_2$(Me-DAB) (DAB = 1,4-diaza-1,3-butadiene) 31
Molecular switches
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127
MRI contrast agents
Similarities and differences between the isoelectronic Gd^{III} and Eu^{II} complexes with regard to MRI contrast agent applications 363

N-alkyl-*N*′-acyl(aroyl)thiourea
New chemistry with old ligands: *N*-alkyl- and *N*,*N*-dialkyl-*N*′-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473
Nervous system
ICCC34 — golden edition of coordination chemistry reviews. Coordination chemistry for the neurosciences 333
NMR
Similarities and differences between the isoelectronic Gd^{III} and Eu^{II} complexes with regard to MRI contrast agent applications 363
N,*N*-alkyl-*N*′-acyl(aroyl)thiourea
New chemistry with old ligands: *N*-alkyl- and *N*,*N*-dialkyl-*N*′-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473

Oligopyridines
Schiff-based bipyridine ligands. Unusual coordination features and mesomorphic behaviour 195
Organic radicals
Studies on the genotoxicity of chromium: from the test tube to the cell 537
Organometallic crystal engineering
Design of organometallic molecular and ionic materials 225
Organometallic materials
Design of organometallic molecular and ionic materials 225
Organometallic polymorphism
Design of organometallic molecular and ionic materials 225
Osmium
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127
Oxidation
Dinuclear metal complexes and ligands: stabilities and catalytic effects 55
Oxychlorine species
The reactions of transition metal ions with chlorine(III) 449

Packing
Schiff-based bipyridine ligands. Unusual coordination features and mesomorphic behaviour 195
p Block metals
Phosphinidine complexes of p block metals; new routes to cyclic ligands and Zintl phases 155
Pd(II)
New chemistry with old ligands: *N*-alkyl- and *N*,*N*-dialkyl-*N*′-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473
Phosphinic acid
Complexes of tetraazacycles bearing methylphosphinic/phosphonic acid pendant arms with copper(II), zinc(II) and lanthanides(III). A comparison with their acetic acid analogues 287
Phosphinidine complexes
Phosphinidine complexes of p block metals; new routes to cyclic ligands and Zintl phases 155
Phosphonic acid
Complexes of tetraazacycles bearing methylphosphinic/phosphonic acid pendant arms with copper(II), zinc(II) and lanthanides(III). A comparison with their acetic acid analogues 287
Photochemistry
Photochemistry and electronic spectroscopy of the $Ru(SnPh_3)_2(CO)_2$(α-diimine) com-

plexes: an ab initio investigation of the model system $Ru(SnH_3)_2(CO)_2$(Me-DAB) (DAB = 1,4-diaza-1,3-butadiene) 31
Photoinduced energy-transfer
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127
Platinum antitumour drugs
Current status of *trans*-platinum compounds in cancer therapy 383
Polydentate ligands
New transition metal imido chemistry with diamido-donor ligands 65
Polypyridine
Shape- and enantioselective interaction of Ru(II)/Co(III) polypyridyl complexes with DNA 513
Polypyridyl complexes
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127
Porous materials
The development of chiral metallacrowns into anion recognition agents and porous materials 489
Porphyrin
Actinide expanded porphyrin complexes 411
Protein complexes
Chemical selection of elements by cells 583
Pt(II)
New chemistry with old ligands: *N*-alkyl- and *N,N*-dialkyl-*N'*-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473
Pyridazine
Doubly pyridazine-bridged macrocyclic complexes of copper in +1, +2 and mixed valent oxidation states 3
Pyridine-like ligands
Current status of *trans*-platinum compounds in cancer therapy 383

Redox reactions
The reactions of transition metal ions with chlorine(III) 449
Redox responsive agents
Similarities and differences between the isoelectronic Gd^{III} and Eu^{II} complexes with regard to MRI contrast agent applications 363
Rhenium
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127
Rh(III) complexes
New chemistry with old ligands: *N*-alkyl- and *N,N*-dialkyl-*N'*-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473
RP-HPLC determination
New chemistry with old ligands: *N*-alkyl- and *N,N*-dialkyl-*N'*-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473
Ru(II) complexes
Shape- and enantioselective interaction of Ru(II)/Co(III) polypyridyl complexes with DNA 513
Ruthenium
Control of photoinduced energy transfer between metal-polypyridyl luminophores across rigid covalent, flexible covalent, or hydrogen-bonded bridges 127

Schiff-based ligands
Schiff-based bipyridine ligands. Unusual co-ordination features and mesomorphic behaviour 195
Solution properties
Complexes of tetraazacycles bearing methylphosphinic/phosphonic acid pendant arms with copper(II), zinc(II) and lanthanides(III). A comparison with their acetic acid analogues 287
Spectrochemical
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173
Stability constants
Dinuclear metal complexes and ligands: stabilities and catalytic effects 55
Schiff-based bipyridine ligands. Unusual co-ordination features and mesomorphic behaviour 195

Tetraazacycles
Complexes of tetraazacycles bearing methylphosphinic/phosphonic acid pendant arms with copper(II), zinc(II) and lanthanides(III). A comparison with their acetic acid analogues 287

Thin film pre-concentration
New chemistry with old ligands: *N*-alkyl- and *N*,*N*-dialkyl-*N*′-acyl(aroyl)thioureas in co-ordination, analytical and process chemistry of the platinum group metals 473
Thiolate
Molecular design of luminescent dinuclear gold(I) thiolate complexes: from fundamentals to chemosensing 173
Trans configuration
Current status of *trans*-platinum compounds in cancer therapy 383
Transition metal
Transition and post-transition metal systems incorporating linked synthetic macrocycles as structural elements 249
Transition metal complexes
Studies on charge distribution and valence tautomerism in transition metal complexes of catecholate and semiquinonate ligands 99
The reactions of transition metal ions with chlorine(III) 449
Transition metals
New transition metal imido chemistry with diamido-donor ligands 65

Uranyl cation
Actinide expanded porphyrin complexes 411

Valence tautomerism
Studies on charge distribution and valence tautomerism in transition metal complexes of catecholate and semiquinonate ligands 99

X-ray crystal structure
Doubly pyridazine-bridged macrocyclic complexes of copper in +1, +2 and mixed valent oxidation states 3
X-ray solid state structure
Similarities and differences between the isoelectronic Gd^{III} and Eu^{II} complexes with regard to MRI contrast agent applications 363
X-ray structure comparison
Complexes of tetraazacycles bearing methylphosphinic/phosphonic acid pendant arms with copper(II), zinc(II) and lanthanides(III). A comparison with their acetic acid analogues 287
X-ray structures
Schiff-based bipyridine ligands. Unusual coordination features and mesomorphic behaviour 195

Zintl compounds
Phosphinidine complexes of p block metals: new routes to cyclic ligands and Zintl phases 155
